### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: claims 1-20 are allowed over the prior art of record because all of references of the record, viewed as closest prior art and considered alone or in combination, fails to suggest or fairly teach a circuit/method for performing a target search on an optical storage disc comprising a combination of all of: a first signal generator or step for generating a first intermediate signal according to a readout signal generated by an optical storage device; a second signal generator or step for generating a second intermediate signal according to a track information carried within the readout signal; a third signal generator electrically connected to the first and second signal generators or step for generating a hybrid address signal according to the first and second intermediate signals, wherein the hybrid address signal corresponds to the first and second intermediate signals, and the hybrid address signal is synchronized with the second intermediate signal; and a target search module electrically connected to the third signal generator or step for performing the target search on the optical storage disc according to the hybrid address signal and a target address set by the optical storage device, as recited in claim 11 and corresponding functional method claim 1. Claims 2-10 and 12-20 are allowed with their respective parent claim.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### CITED REFERENCES

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references relate to an optical apparatus including a control unit for searching a target track based on a read address and a target address.
